

The Science and Technology Information Institute STII is the information and marketing arm of the Department of Science and Technology DOST created by virtue of Executive Order No 128 on January 30 1987 where its main mandate is to establish a science and technology databank and library disseminate science and technology information and undertake training on science and technology information to various stakeholders across the Philippines. It is currently located at the DOST Complex in Bicutan Taguig City and it manages several massive flagship projects including DOSTv which is the official weather and science channel of the DOST broadcasting daily science news weather updates and featuring various DOST technologies that help local farmers and businesses. Furthermore STII publishes the S&T Post which is the official quarterly newsletter of DOST and the Philippine Journal of Science PJS a highly respected peer-reviewed multidisciplinary journal in English that publishes reports on original research in the natural and physical sciences making it one of the oldest scientific journals in the country. One of their most famous and crowded projects is STARBOOKS Science and Technology Academic and Research-Based Openly Operated KioskS which is a standalone information kiosk that contains hundreds of thousands of digitized science and technology resources in various formats like text video and audio set in a specially designed pod interface meant to be deployed in remote schools that have absolutely no internet connection. The institute also handles the DOST library services maintaining the largest collection of S&T materials in the country including rare books journals and microfilms. In recent years STII has spearheaded the transition to digital information dissemination fighting fake news in science promoting STEM education among the youth through social media campaigns and ensuring that scientific research reaches the grassroots level by conducting science journalism workshops for local media and high school students in various provinces. Their vision is to be the leading agency and the recognized authority in Science Technology and Innovation STI information in the country by 2030.
